Units

Units cover a particular subject and are designed for use as a text by every student in the class. They are 8 1/2" by 11" in size and punched for a three-ring binder.

Transparencies

These are 8 1/2" x 11" instructional illustrations printed on clear plastic for overhead projection. Each transparency is accompanied either by a printed paper copy, usually with some text on the back, or by a study guide with text. Each set is packaged in a manila pocket folder with the title of the set stamped on the tab.

Study Guides

Study guides are 8 1/2" x 11" printed booklets that may accompany transparency sets of the same title and number. They include reduced-size black and white picture frames adjacent to the narration or script for the frame. Study guides are used for narration, to review the presentation, and for independent study. They are included in the price of transparency sets.

Color Photo Sheets and Booklets

Color photo sheets, 8 1/2" x 11", consist of detailed close-up pictures on one side and concise descriptions on the reverse side. Crop Plants, Horticulture Diseases, Pests, and More, and Diseases and Pests of Field Crop Plants are booklets with photo sheets, 8 1/2" x 11", spiral-bound.

Diseases of Soybeans and Corn, Insect Pest Identification of Corn, Soybeans, and Alfalfa, and Vegetative Identification of Common Row Crop Weeds are pocket-sized spiral-bound pocketbooks. These informative color pocketbooks are useful for identification purposes in the classroom or in the field.

AgriLearning and mAGic Kits

AgriLearning kits are designed for grades K to 6 and they help reinforce language arts, reading, mathematics, social science, and agriculture.

The mAGic kits are developed to meet learning standards in English, math, science, and social studies for grades 4 to 8. All materials are packaged in each kit.

Digital Slide Sets

Digital slide sets are distributed on CD-ROM and have the catalog number prefix of MDS. These Microsoft PowerPoint presentations work equally well on Windows and Macintosh machines.

Digital slide sets have colored backgrounds and are intended for onscreen use (computer display or projected via a data projector).

Digital Transparency Sets

Digital transparency sets are distributed on CD-ROM and have the catalog number prefix of DT. These Microsoft PowerPoint presentations work equally well on Windows or Macintosh machines.

Digital transparency sets differ from digital slide sets in that the digital transparency sets have uncolored backgrounds and are suitable for printing to transparency film for overhead projection.

Quiz Packs

The quiz packs are developed in Microsoft PowerPoint and should run well on PCs and Macs. They are designed to be distributed to students as they review for specific topic areas at individual work stations, including a school computer lab, classroom computers, or home and laptop computers. Quiz packs consist of 10 CD-ROMs containing the practice quizzing sessions and interactive quizzing sessions from resource CD-ROMs. The quiz packs are ideal for students that need review sessions that provide immediate feedback during quizzing, interactive quiz sessions, and for preparing students to participate in Career Development Events.
